### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claimed subject matter in claims 1-9 is allowable because the arts of record fail to teach or fairly suggest the claimed "a communications device for detecting user transmitted symbols encoded in spread spectrum waveforms (hereinafter "user waveforms") comprising in combination of:

a digital signal processor (hereinafter "DSP") that processes user waveforms to determine characteristics thereof, the DSP having an associated memory and an associated direct memory access (hereinafter "DMA") controller that controls access to that memory; and

a programmable logic device (hereinafter "PLD") that is coupled to the DMA controller and that configures it to move data relating to user waveform characteristics from the memory to a buffer external to the DSP.

Wherein said user waveform characteristics comprise one or more waveform amplitude" as in claims 1 and 6 (in addition to the claimed first-in-first-out memory in claim 6). See figure 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent numbers 5,475,818 and 6,948,010 issued to Molyneaux et al. and Somers et al. respectively disclose a COMMUNICATION SYSTEM HAVING dsp AND pld.
